Brentwood Fire Station Undergoing Mold Remediation

Brentwood, Missouri – January 26, 2018 – An investigation in 2017 determined mold was present above the second-floor ceilings in the Brentwood fire station. In Fall 2017, the City of Brentwood solicited bids for mold remediation services; the Board of Aldermen approved the lowest bidder's contract on November 6, 2017. The remediation process is expected to be completed by April 2018.

During the remediation process, the firefighters are living in the basement level of the fire station, which has been renovated to serve as a living space. When the firefighters return to the second-floor living quarters, the lower level will serve as a new multipurpose space for the City's use.
